

## PRICE WATCH ANNEX : April Prices

May 27, 2011

The Price Watch Annex provides prices and price changes for key markets and staple foods monitored (mostly at the retail level) across FEWS NET countries and regions. The prices listed below are final and official average monthly prices for April 2011.

		Major Food Commodities				
Major markets	Current price/kg US\$ price	Percentage change			Change over 1 month, over 1 year, and over 2 years (→)	
		Over 1 month	Over 1 year	Over 2 years

NOTES: The commodities shaded in brown are the staples most often consumed by the poorest of the poor in the market areas indicated. Additional commodities provided are important commodities consumed in the same areas or fuel prices that affect food prices. Final and official monthly average prices are used. The symbols (▲▶▼) depict the direction of price changes: the red upward-facing arrow denotes an increase of 5 percent or greater, the blue horizontal arrow denotes no change or changes that are smaller than 5 percent, and the green downward-facing arrow denotes price decreases that are 5 percent or greater. The three arrows respectively correspond to the percent change in prices this month compared to last month, last year, and two years ago. The “-” symbol indicates that data are not available. An asterisk (\*) next to a commodity means that the price given is a wholesale price. Otherwise, all reported prices are retail.
